

ADVANTIV ENGINEERING SITE SERVICES

Modern day demands on production targets added with the short supply of skilled engineers, often results in a need for out-sourced labour. We work closely with our customers to ensure equipment stays operational and production plans on track with our services for routine maintenance, inspections, planned and unplanned interventions. Our SafeContractor accreditation ensures that Advantiv meet the necessary requirements around health and safety, equal opportunities, diversity and environmental management practices.

OUR ENGINEERS WORK ON SITE HELPING OUR CLIENTS ACROSS A RANGE OF PROJECTS:

ENERGY EFFICIENCY IMPROVEMENTS

Surveys and corrective work including compressed air, lighting, drive control, vacuum technology, motor efficiency improvements, electrical losses, chillers, and lagging.

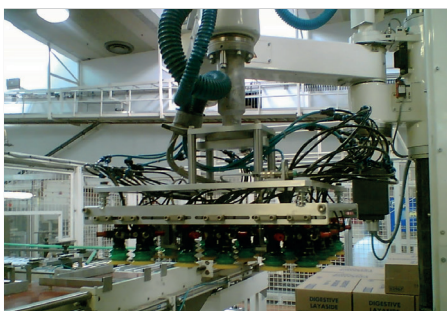

WASTE REDUCTION & PRODUCT RECYCLING

Investigating and solutions as why is product dumped, damaged, or wasted, how can it be protected if this occurs and how can it potentially be re-instated into production.

HEALTH & SAFETY REQUIREMENTS & INITIATIVES

Assessing and rectifying safety issues such as new guarding, barriers, access equipment, flooring, sensory products, and staff welfare products & areas.

SYSTEM UPGRADES AND IMPROVEMENTS

Raising awareness of new products, improving line efficiencies, reducing downtime & waste, and designing systems to help overcome or improve site issues.

FACILITIES MAINTENANCE

General maintenance including provision of repairs, implementation of upgrades, improvements in energy use, and the establishment and management of servicing contracts.

DOWNTIME IMPROVEMENTS

Working with clients to help identify & resolve repetitive failures, offering advice, supplying, and installing better suited products & equipment to improve machine uptime.

WELFARE REQUIREMENTS

Assessing and rectifying safety issues such as new guarding, barriers, access equipment, flooring, sensory products, and staff welfare products & areas.

PROVISION OF WORKSTATIONS

Improving and simplifying work areas, including the assessment, design, manufacture, and installation of mobile or fixed equipment & accessories.

MANUFACTURED PARTS AND EQUIPMENT

From the assessment of an issue that needs resolving or improving through the design, drawing and fabrication and installation of specialised and bespoke parts & equipment.

STORES IMPLEMENTATION

From the initial design concept, specification, and installation through to re-stocking, identification, labelling and functioning of main stores and storage areas.

WORKSHOP DESIGN AND UPGRADES

Design, kitting and installation of engineering workshop and machine shop areas, including the supply of the larger machine tools and functional tool storage systems.

"...with limited resources and time being of the essence, it's not always possible for our clients to solve engineering problems in-house, this is where our services team become an extension of your workforce working together to identify and implement solutions..."

Alistair Crouch, Director

Our site services team listen to your requirements understanding the issues facing your site and work with you to implement process and efficiency changes to help you become more profitable, safe, efficient and compliant.
